Download and install either Python from [Python.org](#) (<https://www.python.org/downloads/windows/>) or [Anaconda distribution](#) (<https://www.anaconda.com/>) which includes Python, Spyder IDE, and Jupyter notebook. I would recommend using Anaconda as it's popular and used by the Machine Learning & Data science community.

Follow [Install PySpark using Anaconda & run Jupyter notebook](#) (<https://sparkbyexamples.com/pyspark/install-pyspark-in-anaconda-jupyter-notebook/>).

Install Java 8

To run the PySpark application, you would need Java 8 or a later version hence download the Java version from [Oracle](#) (<https://www.oracle.com/technetwork/java/javase/downloads/jdk8-downloads-2133151.html>) and install it on your system.

Post-installation set JAVA_HOME and PATH variable.

PySpark Install on Windows

PySpark is a Spark library written in Python to run Python applications using Apache Spark capabilities. so there is no PySpark library to download. All you need is Spark; follow the below steps to install PySpark on windows.

1. On [Spark Download](https://spark.apache.org/downloads.html)

(<https://spark.apache.org/downloads.html>) page, select the link “Download Spark (point 3)” to download. If you wanted to use a different version of Spark & Hadoop, select the one you wanted from drop-downs, and the link on point 3 changes to the selected version and provides you with an updated link to download.

Download Apache Spark™

1. Choose a Spark release: **3.0.0 (Jun 18 2020)**
2. Choose a package type: **Pre-built for Apache Hadoop 2.7**
3. Download Spark: **spark-3.0.0-bin-hadoop2.7.tgz**

Verify this release using the 3.0.0 release key on the [previous page](#) KEYS.

[PySpark – Read & Write Parquet File](#)
(<https://sparkbyexamples.com/pyspark/pyspark-read-and-write-parquet-file/>).

2. After download, untar the binary using [7zip](#) (<https://www.7-zip.org/download.html>) and copy the underlying folder `spark-3.0.0-bin-hadoop2.7` to `c:\apps`

3. Now set the following environment variables.

```
SPARK_HOME = C:\apps\spark-3.0.0-bin-hadoop2.7
HADOOP_HOME = C:\apps\spark-3.0.0-bin-hadoop2.7
PATH=%PATH%;C:\apps\spark-3.0.0-bin-hadoop2.7\bin
```

Install winutils.exe on Windows

Download winutils.exe file from [winutils](#) (<https://github.com/steveloughran/winutils/blob/master/hadoop-2.7.1/bin/winutils.exe>), and copy it to `%SPARK_HOME%\bin` folder. Winutils are different for each Hadoop version hence download the right version from <https://github.com/steveloughran/winutils> (<https://github.com/steveloughran/winutils>).

PySpark shell

Now open the command prompt and type `pyspark` command to run the PySpark shell. You should see something like this below.

Spark-shell also creates a [Spark context web UI](#) (<https://sparkbyexamples.com/spark/spark-web-ui-understanding/>) and by default, it can access from <http://localhost:4041> (<http://localhost:4041/>).

History Server

History servers, keep a log of all PySpark applications you submit by spark-submit, pyspark shell. before you start, first you need to set the below config on spark-defaults.conf

```
spark.eventLog.enabled true
spark.history.fs.logDirectory file://
```

Now, start the history server on Linux or Mac by running.

```
$SPARK_HOME/sbin/start-history-server
```

If you are running PySpark on windows, you can start the history server by starting the below command.

```
$SPARK_HOME/bin/spark-class.cmd org.
```

By default, History server listens at 18080 port and you can access it from the browser using <http://localhost:18080/> (<http://localhost:18080/>)

Hi Sindhu, Why you have #
infront of the properties.
Remove # and try again.

‘pyspark’ is not recognized as
an internal or external
command, operable program
or batch file– please provide
the solution for this error. It
will be useful for others as well

Hi Bash, Are you using
windows or Linux platform?
regardless you need to set the
following on environment
variables. Let me know if you
don’t know how to set these.
SPARK_HOME =
C:\apps\spark-3.0.0-bin-
hadoop2.7
HADOOP_HOME =
C:\apps\spark-3.0.0-bin-
hadoop2.7
PATH=%PATH%;C:\apps\spark-
3.0.0-bin-hadoop2.7\bin
Change the path according to
your setup.
